Other supply chain links and details:	-		
General comments			

Although there is no evidence of soy production in the area, the property is surrounded by soy cultivation, which might indicate that it is part of a soy expansion area. The property is registered under Pedro Silvestre da Silva in the federal land tenure system. However, in the CAR system, the property has a "validated" CAR under Marcos Catão Dornelas Vilaça and Andrea Coelho de Carvalho Vilaça. Marcos is a former president of Mato Grosso Agricultural Defense Council (INDEA). In 2021, he asked to be dismissed from the position after being involved in a denouncement of sexual harassment (1), for which he was considered not guilty by the Court of Justice in 2022 (2). In March 2023, Marcos Vilaça received authorization for deforestation and wood exploitation of 175 hectares at Lote Rural LE, valid until 2028 (3).
