General comments			
<p>In November 2022, the environmental impact report (EIA/Rima) for the implementation of Fazenda Bananeira, Solta I and Solta II showed that the planned clearance of native vegetation aimed at the establishment of 5,893 hectares of pasture. At the farm's full capacity, to be reached in 2025/2026, 5,000 head of cattle will be raised in the area (1). The environmental impact report is one of the steps required to obtain an environmental license for the establishment of production activities. According to the document, the farm is operated by Alzir Pimentel Aguiar Neto, president of the Piauí Soybean Producers Association (2), and notary documents confirm that he bought these farms in October 2022 (3). The company Emaflor Empreendimentos Rurais e Participações and Alzir Pimentel Aguiar Neto are the shareholders of the company AZN Participações (AZN group), currently responsible for managing, among others, Fazenda Emaflor, a project financed by Banco do Nordeste (4) and one of the recent deforestation cases reported in the RDM 13 published in June 2023 (5). Alzir Neto opposes the expansion of the Soy Moratorium to the Cerrado region and led the farmers' resistance against initiatives from Abiove and Bunge to include anti-deforestation clauses in contracts signed with producers in Piauí (6).</p>
